

Sliding Glass Doors

SOUNDLY PERFORMING FOR OVER 40 YEARS

STRENGTH - PERFORMANCE - SELECTION

NuAir has been manufacturing aluminum sliding glass doors in Florida since the early 1960's and we are continually improving our products for maximum efficiency. We use only the finest components ensuring your door will deliver a lifetime of performance. Renowned for strength, aluminum sliding glass doors provide the stability, security and clean narrow sight lines that architects, builders and homeowners desire. These smooth, silent rolling doors fill rooms with light while offering wide-open views. You can choose from a selection of grid and glass options that will add character to any doorway. NuAir's products are tested to the rigorous Miami Dade protocols and, as a result, our doors are found in projects ranging from entry-level homes and multifamily projects to custom homes and light-commercial applications.

Sliding Glass Doors - Quick Specs.

Sliding Glass Door Series

- Series 200
- Series 500
- Series 975
- Series 9000 (NuImpact™)

Frames, Tracks & Headers

- Heavy gauge aluminum frames and tracks. Jambes are a minimum of 2-3/8" (one track) and a maximum of 6-7/8" (four track) providing excellent structural and wind load test results.
- Standard 1-1/2" sloped sill track with optional sill risers available to 4"
- Wide, upscale stile profiles available on some models.

Panel Configurations

- Available one to four tracks and up to eight panels in pocket or bypass configurations. (see configuration chart)

Frame Colors

- White
- Bronze
- Mill Finish (200 Series Only)

Grid Configurations

- One Lite
- Colonial
- Hyde Park
- Double Hyde Park
- Custom Lite Design (Requires dimensioned drawing)

Glazing

- Doors are available with monolithic tempered glass or Insulated Glass units with a tempered sacrificial lite.
- Marine glazing on some models provide minimum heat gain and easy serviceability.

Glass Options

- Clear
- Obscure
- Turtle (low light transmittance)
- Low-E (low emissive)
- Laminated

Grid Styles

- Raised grid without backer
- Raised grid with backer
- Grids Between Glass (GBG)
- NuGroove™ (ODL)
- NuBevel™ (ODL)

200 Series

FEATURES

Popular Options and Styles

- Heavy gauge aluminum frame track and sill.
- Available one to four tracks and up to eight panels in pocket or bypass configurations.
- Full perimeter marine glazing for minimum heat gain and water tightness.
- High performance double perimeter weather stripping.
- Standard 1-1/2" sill with optional sill risers available to 4"
- Single mortise lock standard.
- Available in optional 90° corner door configuration

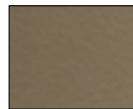

Sliding Glass Doors are available in the following colors:

Mill Finish

White

Bronze

500 Series

FEATURES

Added Strength and Security

- Heavy gauge aluminum frame track and sill.
- Available one to four tracks and up to eight panels in pocket or bypass configurations.
- Full perimeter marine glazing for minimum heat gain and water tightness.
- High performance double perimeter weather stripping.
- Standard 1-1/2" sill with optional sill risers available to 4"
- Wider stile profile provide upscale look and a 1-1/4" deep glass bite.
- Single mortise lock standard

975 Series

FEATURES

Affordable Luxury With Premium Performance

- Heavy gauge aluminum frame track and sill..
- Available one to four tracks and up to eight panels in pocket or bypass configurations.
- Full perimeter marine glazing for minimum heat gain and water tightness.
- High performance double perimeter weather stripping.
- Standard 1-1/2" sill with optional sill risers available to 4"
- Steel reinforced interlock and astragal allow for higher design pressures.
- Stainless steel adjustable rollers.
- Double Mortise lock.
- Tested to Dade 202 protocol.

9000 Series

FEATURES

The Ultimate in Impact Resistance and Protection

- Heavy gauge aluminum frame track and sill.
- Available one to four tracks and up to eight panels in pocket or bypass configurations.
- High performance double perimeter weather stripping.
- Standard 1-1/2" sill with optional sill risers available to 4"
- Steel reinforced interlock and astragal allow for higher design pressures.
- Tandem stainless steel adjustable rollers.
- Double Mortise lock
- Tested to Dade 201, 202 and 203 protocols.
- NulImpact™ - Made with Keepsafe Maximum Laminated Glass.
